

## PRESS RELEASE

### **Framework contract between SPANGLER and HUBER**

#### **Today for a closer cooperation tomorrow**

Dietfurt/Töging, 07 September 2016 – On 07 September 2016 the Upper Palatine company invited its employees to a ceremony. The result of the long-term and eventful past was an alliance with a framework contract which provides a solid basis for the companies' relationship in the future.

#### **Intense friendly exchange**

It has been more than 35 years since the first order, Hannelore Spangler says to the employees as well as to Mr. Dr.-Ing. Oliver Rong, Management Board of Huber SE, and Mr. Alexander Weber, Purchasing Manager at Huber, in a short speech. Since then both companies have developed themselves to an internationally operating company. The working relationship between both companies is still very successful. An active mutual exchange does exist which becomes more and more intense and profound through constantly new further developments such as the ongoing digitalization and thereby supports as an accelerator the company Huber as market leader in the field of water treatment, wastewater treatment and sludge treatment.

#### **Facilitations during daily working life**

From this long-term and successful relationship a framework contract was concluded for the first time which will reinforce the future and lead the long-term cooperation of both companies into an even more productive direction. In future, the framework contract will come into force for all projects and does include clear guidelines about issues such as delivery times, documentations, payment and delivery terms, delay in delivery, packaging, quality assurance and many other points.

#### **Give and Take**

Dr. Oliver Rong also praised the long-term common past as well as the positive future. He added that this contract put the existing shared understanding into writing.

“The framework contract is a milestone in our company's history which we cannot and must not rest on. On the contrary, we also have to make great efforts in the future so that the company HUBER is satisfied with us and orders our products,” Hannelore Spangler concludes.

---

## About SPANGLER

SPANGLER GMBH employs around 130 people at its headquarters in Töging in the Altmühl valley and has been a reliable partner of the national and international mechanical and plant engineering for 35 years. More than half of the plants produced are exported worldwide.
